Tourism is the “front door” to economic development

Tourism Investment is Smart

- Tourism in the state of Minnesota is a \$14.4 billion industry annually.
- Tourism in Minnesota generates jobs, supporting nearly 260,000 full and part-time leisure and hospitality jobs in communities across the state, paying \$5.1 billion in wages. Tourism positively impacts virtually every county in Minnesota.
- A total of 11% of all private sector employment and nearly 17% of all state sales taxes is generated from the leisure and hospitality sector.

Tourism Return on Investment

- Investing in Minnesota tourism has shown a significant return. Every \$1 invested in state tourism advertising generates an estimated \$9 in state and local taxes and \$98 in traveler spending.
- The face of tourism is diverse, from small family businesses to major corporations. Minnesota’s leisure and hospitality sector contributes \$14.4 billion in annual gross sales and generates \$930 million in state sales tax each year.
- Tourism and related traveler spending supports a wide variety of Main Street businesses and indirectly supports jobs in many other industries as well.

Tourism is Fueled by Promotion

- Minnesota continues to be vastly outspent by our competitors in the effort to draw visitors and their dollars to other states. By losing market share and drawing a smaller part of the pool of travelers, Minnesota limits the opportunity to grow revenue and jobs that tourism generates.
- Funding major events in Minnesota generates a positive economic impact. Major events across the state shine a spotlight on Minnesota and attract first-time visitors who can return for both tourism and business purposes.
